SUMMARY

Final-year CS undergraduate with 4 deployed ML applications — including a live FIFA 2026 predictor trained on 25,000+ international matches and an AI-powered ATS optimizer using the Gemini API. Skilled in Python, ML pipelines, and interactive dashboards. Available immediately for Data Science, ML, or Analytics internships — remote or hybrid.

TECHNICAL SKILLS

Languages:	Python, SQL, HTML, CSS
Data Analysis:	NumPy, Pandas, Matplotlib, Seaborn, Plotly, Power BI
Machine Learning:	Scikit-learn, XGBoost, SciPy
Libraries:	Streamlit, Flask, FastAPI, FastF1, ReportLab
Tools:	Git, GitHub, Jupyter Notebook, Google Colab, Supabase
Concepts:	EDA, Feature Engineering, Model Evaluation, Hyperparameter Tuning

PROJECTS

FIFA World Cup 2026 Predictor | Python, Scikit-learn, Streamlit, Supabase, APScheduler | [GitHub](#) | [Live](#)

- Trained a GradientBoostingClassifier on 25,000+ international matches with calibrated probabilities, achieving ~57% accuracy — competitive with commercial football models.
- Built a live ELO rating system that updates after each result, with auto-scheduled daily predictions, live group standings, and a knockout bracket — backed by Supabase (PostgreSQL).

AI-based ATS Resume Optimizer | Python, Streamlit, Gemini API, ReportLab | [GitHub](#) | [Live](#)

- Used Gemini API to extract role-specific keywords from job descriptions and rewrite resumes for ATS compatibility with keyword match analysis.
- Built a modular 7-component pipeline with fault-tolerant JSON parsing and one-click PDF export via ReportLab.

Formula 1 Interactive Dashboard | Python, Streamlit, FastF1, Matplotlib, Pandas | [GitHub](#) | [Live](#)

- Built a multi-tab telemetry dashboard covering F1 seasons 2017–2026 with driver speed maps, circuit overlays, and Top 3 animated replays using FastF1 and Matplotlib.
- Implemented local data caching to cut repeat session load times from 30–60s to near-instant.

Student Placement & Salary Predictor | Python, Scikit-learn, Pandas, Streamlit | [GitHub](#) | [Live](#)

- Dual-model system: Random Forest Classifier (Accuracy 88%, F1 0.85) for placement and Random Forest Regressor (R^2 0.75, RMSE 3.05 LPA) for salary estimation.
- Full ML pipeline with feature engineering, class imbalance handling, and RandomizedSearchCV tuning — deployed as an interactive Streamlit app with feature importance visualization.

EDUCATION

Parul University — CGPA: 7.18
Bachelor of Technology, Computer Science

Vadodara, Gujarat
Sept 2023 – Present

CERTIFICATIONS

Supervised Learning with scikit-learn — [DataCamp](#)

Oracle Cloud Infrastructure 2025 Foundations Associate (1Z0-1085-25)

ADDITIONAL INFORMATION

- Solved 225+ problems on [LeetCode](#) covering data structures and algorithms.
- Actively building projects in ML, data analysis, sports analytics, and predictive systems.
- Familiar with version control, GitHub, and self-driven technical learning workflows.
- Available for immediate internship joining — open to remote and hybrid roles.
